

# 30 March

## Comparing Standard and Alternative Model

By default block , next line will prevail

p,ul{

border: 2px solid rebeccapurple;  
padding: 1em;

ul{

display: flex;  
list-style: none;

ul display: flex ( inline ); so next to next if flex not specify , it will be block next to next

.block,li{

border: 2px solid blue ;  
padding :4px;

Too much of preaching today

display , block box not inline so next line, if not block , it moves next line

.block{

display: block;

Too much of preaching today

display , block box not inline so next line, if not block , it moves next line

Para 1

Para 2

.inline{

display: inline;
