

SQL Chapter 6 Sub Queries FSN

SubQueries

- A sub-query is also called a nested query
- syntax of sub-query

- here inner query will be executed first
- o/p of inner query is passed as i/p to outer query
- to write a sub-query, atleast 1 common column should be existing b/w the tables
- Nested sub-queries method to find n^{th} max salary is not efficient, as limit is 32.
