## Prime Intuit Finishing School

We at Prime  
Intuit are very  
passionate  
about shaping  
young minds

```
p{
  font-size: 16px;
  color: green ;
  width: 100px;
  height: 100px;
  border-style: inset;
  border-width: 5px;
  border-color: grey ;
  padding: 50px ;
  align-self: center;
  text-align: right;
  align-items: flex-start;
```

*h2 modified later  
so change in color*

flex-start: cross-start margin edge of the items  
is placed on the cross-start line

```
h2,h3,h4{
  color: purple ;
  font-size: : 24px ;
  width: 800px ;
  text-align: right;
  border-style: dotted;
  background-color: orange;
```

### Heading 3

### Heading 4

## Our Courses Include

## Additional Topics like :

- Advance Excel
- Cloud Computing

- Machine Learning

```
ul{
  border-color: green;
  border-width: 2px;
  border-style: solid;
}
```

### 3. Python Basics

### 4. NLP

### 5. HTML CSS JS Angular

### 6. Tableau

```
sequ{
  color: red;
  font-weight: bold;
}
```

this is para

```
.prompt{
  color: brown;
  background-color: rgb(159, 176, 209)
}
```

```
#spn1{
  background-color: lightblue;
  color: red;
}
```

This is division This is Span , para vs span : span prevails

## Cascading overlapping order last style prevails purple vs red

first external  
rules , then  
inline html rule  
, inline is more  
specific , it will  
prevail , inline  
vs internal ,  
inline prevail

```
body{  
  background-color: lightyellow ;  
}
```
