

30 March

Comparing Standard and Alternative Model

By default block , next line will prevail

ul display: flex (inline); so next to next if flex not specify , it will be block next to next

Too much of preaching today

display , block box not inline so next line, if not block , it moves next line

Too much of preaching today

display , block box not inline so next line, if not block , it moves next line

Para 1

Para 2
